SMA-MPS Training Course for Medical Experts

Jointly Organised and Sponsored by

MPS

Supported by

Academy of Medicine,
Singapore

The evidence in a medical expert report and testimony offered by a medical expert witness during examination are often critical components in arriving at an equitable and fair decision in any dispute. This is applicable in the courts of law, especially for cases of medical negligence, in the medical disciplinary tribunal of professional misconduct, or other inquests.

An expert witness possesses in depth knowledge of a subject that enables him or her to give opinions and draw conclusions relevant to the case, so as to impartially and objectively assist the court or tribunal in its work. The expert witness is expected to articulate the standard of care in medical negligence, the standard of professional conduct in disciplinary tribunals, and present opinions that are supported by strong arguments and evidence.

To serve the course of justice effectively, a medical expert should be familiar with the principles of medical negligence, litigation, and the judicial system. With the rising expectations of the public and patients on the performance and behaviour of doctors, it is timely that competent and skilled medical expert witnesses are available for the benefit of the patients, the public and the profession.

The Medical Protection Society (MPS) and the Singapore Medical Association (SMA), in conjunction with the Academy of Medicine, Singapore (AMS) will be organising a Training Course for Medical Experts.
